

HITESH MORI

SR. GAME DEVELOPER (Team Lead)

 +91 7874504650

 morihitesh3327@gmail.com

OBJECTIVE

As a Team Lead, my objective is to synchronize my dual roles by organizing the collaborative efforts of cross-functional teams, including product managers, art teams, game developers, and support staff. By seamlessly integrating hands-on development with leadership responsibilities, I aim to inspire creativity, drive innovation, and ensure the successful realization of our game's vision. Through effective communication, strategic planning, and a relentless pursuit of excellence, my goal is to lead the team in crafting unforgettable gaming experiences that captivate audiences and leave a lasting impact on the industry.

EXPERIENCE

Feb 2022 – Present (ScaleTech Solutions)

As a Game Team Lead, I have worked on,

- **Goal Setting:** Define clear, achievable goals and deadlines for the team.
- **Team Management:** Manage and mentor team members, including game designers, artists, programmers, and testers, to ensure they have the support and resources needed to succeed.
- **Project Planning and Execution:** Develop project plans, milestones, and oversee their successful execution, ensuring projects are delivered on time.
- **Cross-Functional Collaboration:** Foster effective communication and collaboration between different departments, such as art, design, programming, and QA, to ensure alignment and synergy throughout the development process.
- **Problem Solving:** Address challenges and obstacles that arise during development, providing guidance and support to help the team overcome them and stay on track.
- **Quality Assurance:** Maintain a high standard of quality throughout the development process, conducting regular code reviews and testing to identify and address issues early on.
- **Continuous Improvement:** Encourage a culture of continuous improvement within the team, fostering innovation, learning, and growth to drive future success.

Feb 2019 – Feb 2022 (Time Loop Technologies)

- Learned Unity Game Engine and Phaser web game framework.
- Worked on various mobile, pc and web games like Slot, Casual, Adventure game etc.
