

PROFESSIONAL SUMMARY

Accomplished **Senior Game Developer & Team Lead** with 7+ years of specialized experience in game architecture, Real Money Gaming (RMG) ecosystems, and cross-platform multiplayer systems. Proven leader managing multi-disciplinary engineering, art, and QA teams to ship scalable mobile titles. Expert in payment gateway architectures (Razorpay, PhonePe, Cashfree), custom native Android & iOS plugin development, modular Git submodule pipelines, and 60 FPS mobile performance optimization.

PROFESSIONAL EXPERIENCE

Game Team Lead & Senior Developer — ScaleTech Solutions

Feb 2022 – Present

Leading development across Real Money Gaming platforms, casual, and puzzle titles.

- **Real Money Gaming (RMG) Architecture:** Architected secure Real Money Gaming infrastructure, real-time in-app wallet balance synchronization, anti-tamper transaction state machines, and end-to-end payment gateway integrations (Razorpay, PhonePe, Cashfree) for instant deposit and withdrawal workflows.
- **Custom Native Plugin Engineering:** Developed high-performance native Android (.aar / Java / Kotlin) and iOS (.mm / Objective-C) plugin bridges facilitating seamless payment flows, secure deep linking, and telemetry.
- **Shared Multi-Game Platform:** Implemented Git submodule architecture to maintain reusable core frameworks, common networking logic, UI components, and payment services across multiple concurrent titles.
- **Team Leadership & Sprint Planning:** Lead and mentor a team of 10+ game developers, UI/UX designers, artists, and QA engineers. Establish development milestones, technical design documents, and sprint goals.
- **Code Quality & Mentorship:** Enforce rigorous code reviews, automated CI/CD build scripts, SOLID design principles, and memory optimization guidelines to ensure 60 FPS performance across low-end mobile devices.

Unity Game Developer — Time Loop Technologies

Feb 2019 – Feb 2022

Engineered cross-platform mobile, PC, and HTML5 WebGL games.

- **Gameplay Engineering:** Built core game loops, state machines, and level progression systems for Match-3, Slot, Casual, Adventure, and Educational titles using **Unity (C#)** and **Phaser JS**.
- **Animation & Visual FX:** Implemented 2D Spine character animations, custom water/particle shaders, physics rope mechanics, and dynamic UI transitions.
- **Cross-Department Collaboration:** Partnered closely with Product Managers and Art Directors to translate game design documents into engaging interactive experiences on schedule.

☆ TECHNICAL SKILLS & COMPETENCIES

🕒 RMG & Payments

🔗 TECHNICAL HIGHLIGHTS & ENGINEERING IMPACT

Real Money Gaming (RMG) Ecosystems & Payment Integrations

Designed and deployed production-grade payment pipelines supporting **Razorpay**, **PhonePe**, and **Cashfree**. Built client-side state verification, cryptographic token validation, and double-spend prevention logic. Handled instant webhooks and wallet balance synchronization across multi-game real money platforms.

Native Mobile Bridge & Plugin Architecture

Engineered low-level Android (.aar / JNI) and iOS (.mm / Objective-C) plugins to bridge platform-specific SDKs with Unity C#. Enabled direct hardware acceleration, biometric authentication, seamless deep linking, and custom in-app purchase and payout flows with zero UI lag.

Scalable Code Architecture & Modular Submodules

Pioneered Git submodule-based repository management to decouple core game engines, network protocols, audio managers, and UI components into reusable packages. Reduced time-to-market for new game titles by over 40% while maintaining unified code standards across development squads.

60 FPS Performance Optimization & Memory Profiling

Spearheaded memory leak identification, draw-call reduction, texture atlasing, and Garbage Collection optimization for smooth 60 FPS gameplay. Integrated enterprise telemetry, analytics, and attribution stacks including **Firebase**, **PlayFab**, **AppsFlyer**, **Adjust**, **AdMob**, **IronSource**, and **Freshchat**.

🎓 EDUCATION

B.E. in Computer Engineering

GEC Bhavnagar (6.5 GPA)

August 2015 – May 2019

Higher Secondary Certification (H.S.C.)

Shikhar Public School (67%)

June 2013 – March 2015

🏆 CERTIFICATIONS & DETAILS

✓ Mathematics for Computer Games Dev

Unity Game Engine Mathematics

✓ Design Patterns for Game Programming

Architectural Patterns in C# & Unity

Date of Birth

27 June 1998

Languages

English, Hindi, Gujarati (Native)

Hobbies

Chess, Reading Tech Articles

Address

Dhrangadhra, Gujarat (363310)
